DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26, 29-35 and 37-38 (renumbered as claims 1-35) are allowed.
2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest a method and system of providing electronic surveillance message to a surveillance platform when an outgoing call leg from a first switch is correlated to an incoming call leg from a second switch as recited in independent claims 1, 22, 23, 29, 31, 33, 34 and 38 and shown in figure 1.

Prior art of record, Bertacchi (5,790,638) deals with call transfer calling services and is silent with respect to using correlation information to correlate an outgoing call leg from a first switch to an incoming call leg from a second switch so that an electronic surveillance message may be sent to a surveillance platform.

Prior art of record, Taff et al (6,845,152) teaches a system and method that stops call looping but is also silent with respect to using correlation information to correlate an outgoing call leg from a first switch to an incoming call leg from a second switch so that an electronic surveillance message may be sent to a surveillance platform.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
